Team Name:

Github:

Each section will be graded on a 1-5 scale:

Clean Code 25%	Architecture 25%	Security 25%	Useability 25%	BlockChain +10%

1. Clean Code: Is the Code easy for other programmers to understand, modify, and test?

2. Architecture: How efficiently is the code structured?

3. Security: What security measures were taken?

4. Usability: How easily can users complete their primary goals within the software/app?

5. Theme fit: Did the team implement blockchain? (Yes = +10%)
